@padc\_myanmar

## Intent Filter

- \* Specify type of Intent that component would like to receive

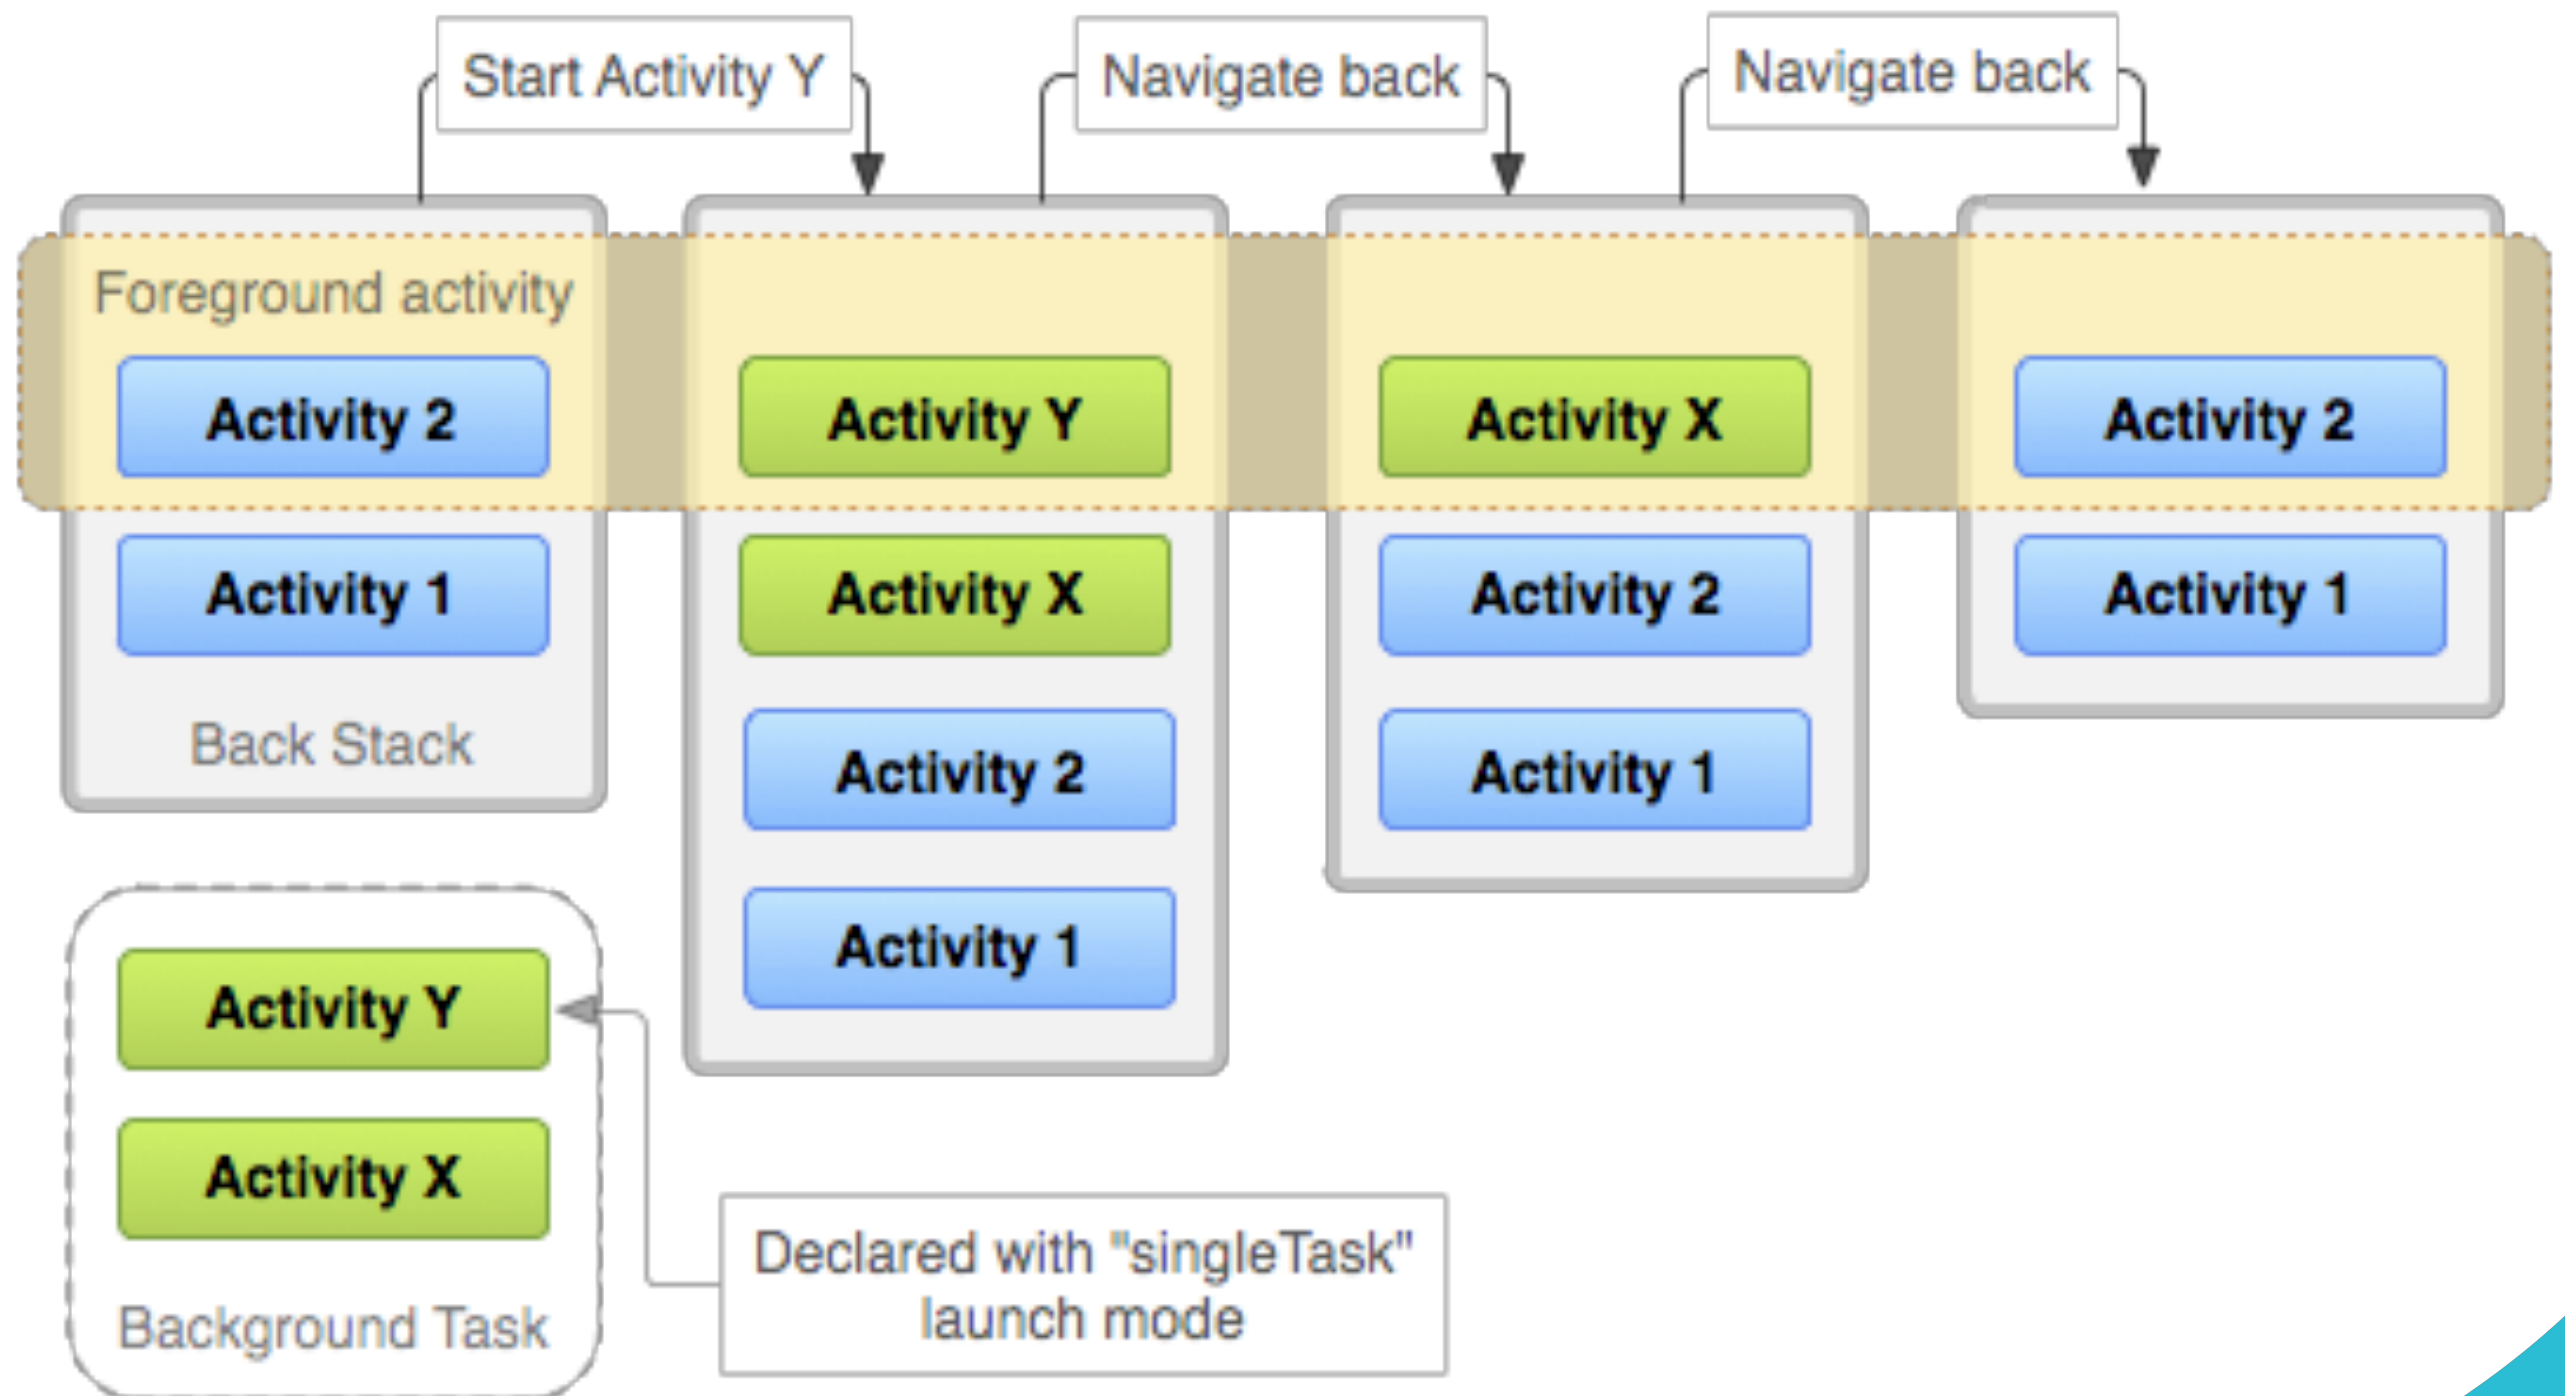

## Activity Launch Mode

- ▶ standard -A->B->C->D->D.
- ▶ singleTop - A -> B -> B -> C -> D (onNewIntent).
- ▶ singleTask -A->B->C->D.
- ▶ singleInstance - A.

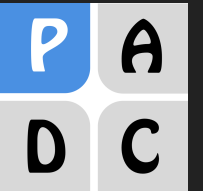

# Back pressing & launching activity as singleTask

## Adapter based Views

- \* A view that used an **Adapter** to display data
- \* Data is usually a **collection**
- \* Have an item-view to display **each data** in the collection
- \* Use view recycling logic to display **infinite** amount of Data

# RecyclerView

## Steps to setup

- \* Setup the layout file for item-view
- \* Setup POC logic file for item-view and POC adapter
- \* Put an adapter based view into main layout and attach with the adapter

**View Pager**
